Protective Equipment	Reclosers & Breakers, Instrument Transformers, Cutouts, Arc Mitigation Devices & Relays
Distribution Switchgear	Vacuum & Gas Insulated Power Circuit Breakers, Switchgear, SafeGear Arc Resistant MetalClad Switchgear, 5-27 kV MetalClad Switchgear, LV Secondary Unit Substations, Drawout Power Circuit Breakers, Gas Insulated Switchgear, Substation Breakers, Ultra-Fast Grounding Device
Low Voltage Systems	Low Voltage Switchgear, Unit Substations, Low Voltage Motor Control Centers
Relays	ABB Relion Family, IEC 61850, Microprocessor Relays, for Protection, Control, Measurement, and Supervision of Power Systems. Also, Solid State and Microprocessor Distribution Protection Formerly ASEA, W, ITE & Brown Boveri Relays. HV Protection, Substation Control Relays and Communication & Relay Components. Arc Mitigation Relays & Systems.
Instrument Transformers	Instrument Transformers, Molded Current & Voltage Transformers, and Primary Metering Units 600V to 38kV
Parts & Service	Complete service capabilities for all phases of the equipment life cycle for all makes and manufacturers, including spare parts, installation and commissioning, repairs, upgrades, retrofits, and decommissioning.

HITACHI ABB

Power Transformers	Large & Medium Power Transformers, Small Power Transformers, Distribution Transformers Including Pole Type, Pad Mounted, and Underground
Dry Type Power Transformers	Medium & Low Voltage Dry Type Power Transformers (112.5 KVA-10 MVA+), VPI, VPE, Resiblock, Cast Resin and Cast Coil Transformers, Disconnect and Grounding Air Switches, General Purpose Low Voltage Transformers
Power Circuit Breakers	5kV-765kV Power Circuit Breakers, Generator Circuit Breakers
Protective Equipment	Intermediate & Station Class Arrestors
Power Quality	Power Quality Systems, High Voltage & Low Voltage Power Capacitors, Specialty Capacitors, Harmonic Filters, Auto Power Factor Correction, Static Var Compensators
Transformer Components	Power & Distribution Transformer Components Including Bushings, Instruments, Gaskets, Tap Changers, Protective Links, Fuses
Instrument Transformers	Instrument Transformers, Molded Current & Voltage Transformers, and Primary Metering Units up to 500kV
Substations	AC & DC Transmission Systems, Reactive Compensation, Station Electrics, Generator Breakers, GIS Switchgear
Turnkey Projects	Substations, Microgrids, Battery Energy Storage, Renewables, Engineering, Equipment, Installation, Commissioning, Insurance, Financing, Project Management, Training, and Maintenance.
Parts & Service	Complete service capabilities for all phases of the equipment life cycle for all manufacturers, including spare parts, installation and commissioning, repairs, upgrades, retrofits, and decommissioning. Also providing renewal Parts & Upgrading Kits for Westinghouse Power Transformers, Power Circuit Breakers, GE Large Power Transformers, ITE Oil & SF6 Power Circuit Breakers, ASEA Power Transformers and Replacement Bushings, Out-of-Warranty Field Service.

Advanced Cable Bus systems have an ampacity range from 800A to 6000A, and voltage ratings of 480V, 600V, 5kV, 15kV, 25kV, 35kV, and occasionally up to 69kV. Typical applications include connections between transformers and switchgear, tie connections between two pieces of switchgear, between motor control centers and large motors, or between generators and generator breakers or generator step-up transformers. We commonly work on industrial facilities and other types of applications where a large amount of current is needed.

EXM has been an innovator in the field of enclosures for over 40 years, and manufactures to UL, CSA, NEMA/EEMAC, CE, and RoHS standards. EXM produces quality, competitive enclosures, consoles, wireway, cabinets, and accessories. In addition, EXM specializes in custom enclosures, utilizing their innovative online design tool, BoxCAD.

Since 1970 Filnor Inc. has designed and manufactured Electrical Products for a variety of Industries including Transportation, Steel, Aluminum, Utilities, Power Generation, Mining, Chemical, Paper, and Telecommunications.

Our offerings include Disconnect Switches for Isolation, Grounding, and Transfer; Open & Enclosed, 30 Amps to 10,000 Amps, up to 38 kV. A complete line of Power Resistors for Neutral Grounding, Dynamic Braking, AC/DC Motor Acceleration, Load Banks, Ballast, and Transit. AC/DC Motor Controls for Cranes and Auxiliary equipment.

MegaResistors is a Canadian company founded in 2008, specializing in the design and manufacture of high-quality power resistors used for industry intensive and critical applications. MegaResistors broad line of products help meet the needs of your industry, from crane control, to industrial mining, to electrical noise reduction.

Products include: Neutral Grounding Resistors, Neutral Grounding Cabinets, Motor Control Resistors, Dynamic Braking Resistors, Harmonic Filter Resistors, Resistive Load Banks, High Resistance Grounding Systems and Second Ground Fault Protection Systems. All products are proudly designed and manufactured in Canada.
